You can have a great time on a tournament, lets get going!!

Stage 1 Stage 2

Return Create

Create a Tournament Details

It's easy to create your own question - just follow these simple steps.

Step 1

Choose the type of tournament.

Realtime - coders play and rank together

Anytime - players code independently ranked together.

Choose Path - only paths that you have completed or created are available to use.

Step 2

Populate your tournament.

Pick individual problems or push the randomized button for a random set of problem

Step 3

Manager your tournament by ordering the problems.

You can add or remove problems as you feel that it needs a change.
